25X1

SECRET 25X1 Between 17 July and 6 August, the field was occupied by five I1-12s. On some days, the I1-12s made several local flights. Almost every day at various times, individual MiG-15s approached the field from the south. The sircraft did not attempt to land at the field but instead returned toward the south. Between 1:30 p.m. and 3 p.m. on 2 August, no aircraft were observed at the field. There was no sir activity during rainy weather. Truck was observed at the field. During the afternoon, only two Soviet air Force officers were seen in the town area. 25X1 Comment. Neubrandenburg-Trollenhagen airfield is believed to be still occupied by 5 Il-12s, the assignment of which has not been determined. The motor vehicle belong to the ground unit 25X1 of the fighter regiment which had been stationed at Neubrandenburg-Trollenhagen airfield prior to mid-May 1953 and is now stationed at

field in order to service I1-12s stationed there.

Puetnitz airfield. a portion of the ground unit possibly remained at the
